

CURRICULUM VITAE

NAME: Kimiko Yamakawa-Kobayashi, PhD

Professor, Laboratory of Human Genetics,
Division of Food and Nutritional Sciences,
Graduate Division of Nutritional and Environmental Sciences,
University of Shizuoka

EDUCATION AND ACADEMIC CAREER:

- 1989 Graduate from Graduate School of Medical Sciences, University of Tsukuba, PhD.,
University of Tsukuba
- 1989-2002 Research Associate, Institute of Basic Medical Sciences, University of Tsukuba
- 2002-2003 Assistant Professor, Institute of Basic Medical Sciences, University of Tsukuba
- 2003-2013 Associate Professor, School of Food and Nutritional Sciences, University of
Shizuoka
- 2013-present Professor, School of Food and Nutritional Sciences, University of Shizuoka

SELECTED PUBLICATIONS:

1. Inamori T, Goda T, Kasezawa N, Yamakawa-Kobayashi K: The combined effects of genetic variation in the SIRT1 gene and dietary intake of n-3 and n-6 polyunsaturated fatty acids on serum LDL-C and HDL-C levels: a population based study. *Lipids Health Dis.* 12:4 (2013)
2. Waguri T, Goda T, Kasezawa N, Yamakawa-Kobayashi K: The combined effects of genetic variations in the *GPR120* gene and dietary fat intake on obesity risk. *Biomed. Res.* 34:69-74 (2013)
3. Yamakawa-Kobayashi K, Natsume M, Aoki S, Nakano S, Inamori T, Kasezawa N, Goda T : The combined effect of the T2DM susceptibility genes is an important risk factor for T2DM in non-obese Japanese: a population based case-control study. *BMC Medical Genetics* 13:11 (2012)
4. Ohhara Y, Kayashima Y, Hayashi Y, Kobayashi S, Yamakawa-Kobayashi K: Expression of β -adrenergic-like octopamine receptors during *Drosophila* development. *Zoological Science* 29:83-89 (2012)
5. Hiroi M, Nagahara Y, Miyauchi R, Misaki Y, Goda T, Kasezawa N, Sasaki S, Yamakawa-Kobayashi K : The combination of genetic variations in the PRDX3 gene and dietary fat intake contribute to obesity risk. *Obesity* 19:882-887 (2011)
6. Osada K, Miyauchi R, Goda T, Kasezawa N, Horiike H, Iida M, Sasaki S, Yamakawa-Kobayashi K : Variations in the WNK 1 gene modulates the effect of dietary intake of sodium and potassium on blood pressure determination. *J Hum Genet.* 54:474-478 (2009)
